

Urgently Hiring!

We're looking for

HV Battery FMEA Coordination Engineer

Full Time / Contract

On-site • Hefei, China

Powering the Future of EV Safety and Innovation

Job Description

- Lead all FMEA (Failure Modes & Effects Analysis) and FTA (Fault Tree Analysis) topics for High-Voltage Battery systems.
- Prepare initial FMEA entries and conduct final content reviews to ensure top-tier document quality.
- Compile and maintain complete FMEA documentation for all ongoing projects.
- Partner with stakeholders to align on critical inputs for both DFMEA (Design) and PFMEA (Process).
- Create impact-driven presentations and tracking lists to keep teams and management aligned.
- Assist with administrative tasks to optimize and streamline overall FMEA workflows.

Qualifications

- Deep knowledge of FMEA methodology, including both DFMEA and PFMEA.
- Required experience or knowledge in the Automotive and/or HV Battery sectors.
- Proven track record in HV Battery system structure design and practical FMEA implementation.
- Highly motivated, flexible, and thrives under pressure to meet tight deadlines.
- Professional written and verbal communication skills in both English and Chinese
